

**Thought
you couldn't
afford energy
efficiency
equipment?**

THINK AGAIN.

\$0

**No upfront
payment**

**Reduce energy
costs now**

**Pay in
instalments**

Just like mobile phone plans, our payment plans require no upfront investments.

Instead, you pay in monthly instalments – while reducing your energy costs by up to 60% from day one.*

Gain greater cost control

Is your business at the whim of the increasingly volatile energy market?

Energy efficient equipment such as LEDs and solar panels give you control over your energy costs and your own P&L.

Save immediately and be cash flow positive

Once the equipment is installed, your energy bills will be lower. In most cases, electricity bill savings are greater than the payments. So you are likely to be cash-flow positive from the outset.*

Your equipment supplier can crunch your numbers so you can see the business case for yourself.

\$0

Free up capital with \$0 upfront

We know energy efficiency equipment isn't essential to your core business. We get it.

With \$0 upfront investment, our highly competitive payment plans allow you to invest in other areas that are critical to business growth – such as technology, sales and marketing.

Enjoy instant approval

Forget everything you know about other payment plans. No extensive paperwork or long approval times with us.

With instant approval (for transactions up to \$150K[^]), our fast online application process means you can move forward and start saving today.

* Savings depend on several factors which your equipment supplier will discuss with you.

Our payment plans

- For equipment valued between \$3K and \$5 million
- Up to 10-year terms
- Instant approval for transactions up to \$150K^ (with no financials)
- \$0 upfront, highly competitive plans
- Payments may be fully tax deductible

Payment plans for

- Solar power systems including storage
- Efficient lighting
- Voltage optimisation & Power factor
- Chillers, Boilers & HVAC
- Power generators

**“
We were cash
flow positive
from the start
”**

‘We wanted to invest in solar but couldn’t get the CAPEX allocated for another 12 months. And we didn’t want to wait. So when we learnt that we could go on a payment plan, we didn’t hesitate. We paid for it out of our operating budget which meant that our liabilities didn’t increase. And since our energy savings offset our payments straight away, the transaction was cash flow positive from the start.’
